

Blonde, leggy Shelby Thompson isn't just a pretty face, but don't tell that to AFM buyers. Ms. Thompson is here to promote *iKuztom*, the newest offering by Leomark Studios, exhibiting in Loew's Room 210. Ms. Thompson is one of seven beautiful models who built *Kemosabe*, a custom metric bobber for AFT Customs of Jackson, CA. The whole process—including Shelby and fellow model Sukhee Alves riding the Land Speed Trials at the Bonneville Salt Flats—is part of Season One of *iKuztom*, a half-hour commercial series unveiling at the American Film Market. AFM attendees can meet Shelby and hear her story by stopping by the Leomark office from now until Saturday November 5.
